Metal Recycling Software

Your Trusted Metal Recycling Full-Service Software

A weights and measures program that does it all.

Why Choose Us?

Omni Software delivers a comprehensive and customizable platform designed for metal recycling businesses, automating tasks like scale readings, inventory management, and trucking dispatch. This user-friendly web app supports operations of any scale, enhancing efficiency with features like detailed financial reporting and end-of-day reconciliations, allowing you to focus more on running your business.

➤ Increased efficiency (performance and affordability)

➤ Increased accuracy and reinforces internal control

➤ Supports same day payouts (attracts suppliers)

➤ Simplified reporting (state and federal)

➤ Multi-language (international implications)

A simple & powerful tool to elevate your metal recycling business!

What our software can perform:

Purchasing
Our system streamlines scrap transactions with automated data capture, camera control, multiple payment options, and reports for easy reconciliation and inventory updates.

Inventory Management
Inventory updates automatically with purchases and sales, offering various reports and real-time updates to the Cost of Goods Sold, with the flexibility to add new commodities instantly.

Secure Technology
OMNI software offers customizable user access levels, governs transaction limits, and automates policy adherence across various operational aspects.

Spanish/English Version
OMNI's bilingual software, available in both English and Spanish, allows users to instantly switch languages for ease of use and report generation, catering to bilingual staff and Spanish-speaking clients, with additional currency conversion options.

Shipping & Sales
Our automated system streamlines shipping, from contract handling to document generation, seamlessly integrating invoicing and financial reporting.

Operational Efficiency
Our managerial review system includes a Cashier's Control Panel for accurate data entry, flexible scale master controls, embedded commodity images for verification, and traceable cost of goods sold reports.

Integrated Accounting
OMNI generates customizable cashier's accounting reports and ledger entries for integration into automated general ledger systems, adaptable to daily, weekly, or semi-monthly intervals based on customer preference and transaction activity.

Single/Multi Location
Our automated system is 100% capable of handling single or multiple location.

Talk to us:

You are invited to call and inquire and even take OMNI for a "test drive" as we have a cloud-based server ready to provide a real-time demonstration in the privacy of your office. You may call and inquire as to our adaptability into your system, and answer questions as to customization and affordability.
